# HICKS POND

Greenwood Twp., Oxford Co., Me.  
U.S.G.S. Greenwood, Me., (7.5')

## Fishes

Smallmouth bass  
Largemouth bass  
Yellow perch  
Chain pickerel

Minnows  
White sucker  
Hornpout (bullhead)  
American eel

## Physical Characteristics

Area - 89 acres

Maximum depth - 18 feet

Temperatures:

Surface - 75°F

22 feet - 68°F

Principal fisheries: Largemouth bass and chain pickerel

Hicks Pond, located at the end of Route 5 in Greenwood, provides an excellent fishing opportunity for warmwater species. Anglers can expect to catch largemouth bass in the 1-3 pound range and occasionally larger. The shallow weedy water provides ideal pickerel habitat and an abundant population of juvenile perch and minnows provides excellent forage for the bass and pickerel.

A lack of cold, well-oxygenated water during the summer months coupled with intensive competition from the warmwater fish species precludes any coldwater fishery management.

Access is limited to permissive trespass across private property.

Surveyed - August, 1972
